

Does Your Health Insurance Plan *PHIT*?

A lot of advisors are selling “*consumerism*” in health insurance.

CDHPs vs. *HDHPs*? *HSAs* vs. *HRAs*? What’s the difference?

BBR Services has developed *Proprietary Health Insurance Technology (PHIT)* that models various health insurance alternatives and helps quantify those that make the most sense for your organization.

At BBR Services we help you develop a long-term *cost-control* strategy.

Cost-control and lower rates are *not* the same.

Cost-control is about developing a multi-year strategy that can *minimize* rate increases for years to come.

Health insurance strategy is not a “one size fits all” proposition. Each company is different and requires a unique *piece* to complete their employee benefits puzzle.

At BBR Services, we don’t sell products. *We solve problems.*

Contact us today to get your health insurance *PHIT*.
